# School-Assigned iPad: Accessing the Internet While Away From School

Here are the steps you will need to follow to access the Internet when away from school with your school-assigned iPad.

1) Go to Settings > Wifi and connect to the wireless network where you are (example: home wifi, friend's wifi, Panera, McDonalds, library, etc.)

2) Open up a new tab in your internet browser, such as Safari or Chrome. Put in the URL for a website like cnn.com and tap enter. (Be sure NOT to just tap on a saved bookmark or a URL that appears from history. Enter the entire URL like cnn.com, not just cnn and tapping on the suggestion.

3) The iBoss login screen will appear.

4) When the iBoss login page appears, Sign into the iBoss login using your school username and password. Example below:
   a. Username: lastname+4digits
   b. Password: 6 Digit ID

5) You will be redirected to Google if you have connected correctly.

If the iBoss Screen does not appear, or if it does not go to google after you sign in:
- Completely close all of the tabs in your browser by tapping on the "X" in the corner of all open tabs.
   o Then fully close the browser > Double press the Home button and swipe away the browser app
- Restart your iPad.
- Go back to Step 1and try again.

TIPS TO GET CONNECTED
- Be sure to first connect to the wifi where you are located.
- Close ALL open browser tabs and then completely shut down the browser.
- When attempting to connect to iBoss, DO NOT simply tap on a search suggestion or bookmarked URL. Type in the entire URL like cnn.com not just cnn
- You will need to sign in **every time you connect to the Internet** in a new place for the first time.
- You may need to sign in to use the Internet multiple times in the same place depending on how the Internet works at that location (such as at a library or if you are using a hot spot at home to connect).
- The filter will reset every eight (8) hours. You will need to sign in each time you connect to a new Wi-Fi and/or every eight (8) hours on a known Wi-Fi network when you want to connect to the Internet outside of school.

Please seek assistance from your School's Technology Team, if you are having trouble connecting your school-assigned iPad to iBoss.
